Hiring Manager

Capgemini India

Mumbai, Maharashtra

Re: Application for Software Engineer — Mumbai (Job ID: 375124)

Dear Hiring Manager,

I am writing to express my strong interest in the Software Engineer position at Capgemini, Mumbai. As a final-year Computer Engineering student at Pillai College of Engineering (SGPA: 8.95), with hands-on experience in the **development, maintenance, and optimization of software solutions**, I am confident in my ability to contribute meaningfully to Capgemini's engineering teams from day one.

In my current role as a Software Developer Intern at the **National Informatics Center**, I have applied scientific methods to analyze and solve real-world backend engineering problems — designing scalable systems in NestJS and TypeScript, implementing REST APIs and WebSocket-based real-time communication, and independently delivering features with minimal supervision. This experience has given me a strong grounding in the full Software Development Lifecycle, from requirement analysis and system design through to testing and deployment — precisely the profile your job description calls for.

Beyond my internship, I have consistently demonstrated the ability to build and ship under pressure. At **HackOverflow 4.0**, I built an AI Interview Simulator using Next.js, Gemini, and WebSockets. At the **Odoo Hackathon 2025** — selected from over 19,000 participants — I developed QuickCourt, a full-stack sports facility booking platform with role-based access control. These experiences have sharpened my ability to make sound technical decisions, collaborate across teams, and deliver results that matter.

I am also a published researcher — my work on *Real-Time Data Sanitation for Cloud Storage using AI* appears in the UGC-approved Journal of Emerging Technologies and Innovative Research (JETIR, April 2025). This reflects both my commitment to staying at the forefront of technology and my ability to think beyond implementation to the broader impact of software systems.

Capgemini's scale, its emphasis on engineering excellence, and its culture of collaboration make it exactly the environment where I want to grow as a software engineer. I am available for full-time joining from **June 2026** and would welcome the opportunity to discuss how I can contribute to your team.

Thank you for your time and consideration.

Warm regards,

Jiya Singh
